Make Money by Planting Michell's Superb Gladioli Bulbs

Home Grown. Ready in December except Varieties Marked * Which are Ready Now

THE demand for these as a late Winter and early Spring Flower, under glass, is constantly on the increase. There is nothing in culture to-day that is succeeded with so easily. They require little attention and are practically immune from attack of insects or plant diseases.

A temperature of about 60 degrees in the day and 50 degrees at night develops the bulbs best. It pays to support the flowers as they come in bloom.
